Reviewer's report

Version: 7 Date: 8 June 2010

Reviewer: sean scully

Reviewer's report:

Authors have addressed most of the concerns raised. Yet it is essentially a descriptive report without a clear message. Authors have now analyzed Osteosarcoma, Ewing Sarcoma and Chondrosarcoma, separately, only for the age range 0-39 years. Authors recognize and mention the limitations of their manuscript. So, I don't have any further concerns.
