Reviewer's report

Title: An open cohort study for bone metastasis incidence after surgery in breast cancer patients

Version: 2 Date: 28 April 2010

Reviewer: Martin Pecherstorfer

Reviewer's report:

The linguistic style of the paper has been improved markedly. Due to the high number of patients included and the interesting results obtained, I suggest to accept the paper now, although the use of the Japanese histology remains a drawback (which can not be removed).

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
