Reviewer’s report

Title: Characterisation of prostate cancer lesions in heterozygous Men1 mutant mice

Version: 2 Date: 18 June 2010

Reviewer: Cornelis Lips

Reviewer’s report:

answer to reply on page 16:
Androgen independency may be not be the result of reactivation of the AR or AR amplification, but of other pathways activated by multistep carcinogenesis.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
