Reviewer's report

Title: Radiation Therapy for Desmoplastic Medulloblastoma - A Retrospective Analysis of Outcome and Prognostic Factors

Version: 4 Date: 27 May 2010

Reviewer: Ira Dunkel

Reviewer's report:

Major compulsory revisions: None. The authors adequately addressed my concern in the prior version of the manuscript by deleting the first sentence of the abstract conclusion.

Discretionary revision: I had previously suggested that all of the Kaplan-Meier analyses should be accompanied by their 95% confidence intervals and I continue to feel that that would enhance the manuscript.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
