Reviewer's report

Title: Integration of Transcript Expression, Copy Number and LOH Analysis of Infiltrating Ductal Carcinoma of the Breast.

Version: 3 Date: 21 May 2010

Reviewer: Peter Haverty

Reviewer's report:

Review of first revision of "Integration of Transcript Expression, Copy Number and LOH Analysis of Infiltrating Ductal Carcinoma of the Breast"

The authors have addressed all of the issues I raised in my initial review.

Minor Discretionary Revisions:

1. On page 12, in the highlighted text, "These values were obtained by averaging expression values for each probe set across all tumors so that the average is 0.", 'obtained by averaging expression values for each probe set' should be 'obtained by subtracting the probe set average across all tumors from each expression value'.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
