Reviewer's report

**Title:** Irresponsiveness of two retinoblastoma cases to conservative therapy correlates with up-regulation of the VEGF-A pathway.

**Version:** 2  **Date:** 30 July 2010

**Reviewer:** Rossella Rota

**Reviewer's report:**

Fortunato and colleagues have addressed all the criticisms and the manuscript is now acceptable for publication.

MINOR Discretionary Revisions (Suggestions)

1. Authors could include results on hERG1A and B K+ channels in the Introduction section, as they do in the Abstract.
2. It could be of interest whether authors include in the Discussion Section comments on the expression of markers tested in correlation with MVD, AI and PI.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**
