Reviewer's report

Title: Epigenetic regulation of CD44 in Hodgkin and non-Hodgkin lymphoma

Version: 1 Date: 2 July 2010

Reviewer: Alexander Dobrovic

Reviewer's report:

This is a well written paper that provides a comprehensive and useful overview of CD44 methylation in lymphoma.

Discretionary Revisions

My main criticism is that insufficient review has been made of other papers addressing CD44 methylation in the literature e.g Abecassis et al."Re-expression of DNA methylation-silenced CD44 gene in a resistant NB4 cell line: rescue of CD44-dependent cell death by cAMP."

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
