Reviewer’s report

Title: Mucins in neoplastic spectrum of colorectal polyps: can they provide predictions?

Version: 1 Date: 29 June 2009

Reviewer: Yasuyuki Sugiyama

Reviewer’s report:

In Table 1, a total of 114 TVA were analyzed, while I could find 113 cases in terms of polyp site. In addition, in Table 2, authors examined 454 specimens, but I found just 453 at 7 parts and 451 at 1 part. Therefore, the data might not be sound.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
