**Reviewer’s report:**

MAJOR COMPULSORY REVISIONS

---------

The answers to the major compulsory revision questions 3-5 (labelled Associate Editor’s comments) are either not answered or answered inaccurately. Answers to these questions may need to be included in the text and/or require further experiments.

OTHER

If the IC50 was at the nanomolar range why were the experiments done in the micromolar range? The question about serum level was not answered either.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
