Reviewer's report

Title: The PstI/RsaI and Dral polymorphisms of CYP2E1 and head and neck cancer risk: a meta-analysis based on 21 case-control studies

Version: 2 Date: 27 April 2010

Reviewer: Silvia Rogatto

Reviewer's report:

In this revised version Kefu Tang et al. answered all queries adequately, although no further information was attached to the manuscript. Nevertheless, I recommend the publication of the manuscript in BMC Cancer. The manuscript was revised in the minor alterations as suggested.
