Reviewer’s report

**Title:** Localization of uPAR and MMP-9 in lipid rafts is critical for migration, invasion and angiogenesis in human breast cancer cells.

**Version:** 2  **Date:** 19 October 2010

**Reviewer:** Hideki Yamaguchi

**Reviewer’s report:**

This revised manuscript by Hari Raghu et al. has been significantly improved and addresses most of my concerns with the original version. Now I feel that the data presented in this revised version support the conclusions drawn by the authors and warrant recommendation for publication in the BMC Cancer.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I declare that I have no competing interests
