Reviewer’s report

Title: Localization of uPAR and MMP-9 in lipid rafts is critical for migration, invasion and angiogenesis in human breast cancer cells.

Version: 2 Date: 7 October 2010

Reviewer: Charlotte Morrison

Reviewer’s report:

I feel the authors have addressed all the major and minor points that were raised in the first review process

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests
