Reviewer's report

Title: Ccp1, a FGF2 downstream gene, regulates cell proliferation and apoptosis in neuroblastoma cells

Version: 2 Date: 23 November 2010

Reviewer: John K Heath

Reviewer's report:

The authors have addressed the points raised by both referees by clarifying the figures and editing the text. In the main criticisms have been addressed by acknowledging the points raised by textual modification rather than inclusion of more definitive data. Whilst this limits the general impact of the paper it does provide a more rigorous analysis of the present results and sets the scene for future work. The work is therefore suitable for publication in BMC cancer in its present form.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
