Title: Toxic risk for stereotactic body radiotherapy with helical tomotherapy concurrent and following with erlotinib for non-small cell lung cancer patient - case report

Version: 1 Date: 11 August 2010

Reviewer: David Huang

Reviewer's report:

- Major Compulsory Revisions

1. It is a good article for case report, but it needs a carefully rewording with grammar checking
2. P3 In 1 add Helical Tomo before HT because it the first time mentioned
3. P3 In 4 does not be studied??? re-sentencing
4. P4 In 4 what does it mean for “extreme”?
5. P5 Ins 7-12 please reword
6. P5 In 8 hypofractionated “scheme”; In 10 Two separate CT scans were; In 15 Two and half; In 16 for volume it should be 3 dimensions; In 18, delete later
7. P5 In 11, you have separated CT sets, but do you do the re-plan with new CT set?
8. P6 In 2, equals?, In 3 than?, In 5 is it 7 fractions/week?, In 7, in to (into?), of 6 Gy (per fraction?),
9. Rewording for Ins 5-18, p6
10. Rewording Ins 1-4 and Ins 10-19 p7
11. P7 In 4 “mentioned”??
12. Rewording Ins 1-4 p15
13. P15 In 3, what are area within the blue dots, 50% or structure? Where is the target in fig. 1?
14. P16, mean lung dose …5.3 Gy is for total lung or Rt lung or Lt lung?
15. P16, V15 and v20 is the ....and (or??) contralateral...
