Sara Alkner, Pär-Ola Bendahl, Mårten Fernö, Jonas Manjer and Lisa Rydén
BMC Cancer

The question posed by the authors is interesting.
The methods are not really appropriate because there is an important bias in the selection of patients’ population.
The methodology must be reviewed and the discussion re-written.

Level of interest: An article of insufficient interest to warrant publication in a scientific/medical journal

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: Yes, and I have assessed the statistics in my report.
