Reviewer's report

Title: A synergistic antiproliferation effect of curcumin and docosahexaenoic acid in SK-BR-3 breast cancer cells: unique signaling not explained by the effects of either compound alone.

Version: 3 Date: 17 February 2011

Reviewer: Ruby Anto

Reviewer's report:

Even though all the queries raised by the reviewer have not been answered in the manuscript, most of the major concerns have been addressed. The authors have also mentioned that work is going on in the lab to address those queries. Hence the reviewer feels that the manuscript can be accepted in the present form.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
