Reviewer's report

Title: Admission of advanced lung cancer patients to intensive care unit: A retrospective study of 76 patients

Version: 3 Date: 7 January 2011

Reviewer: Jorge Salluh

Reviewer's report:

The authors have addressed all issues and the manuscript is significantly improved.

The only issue I still have is regarding EOL care.

Please specify the total number of patients that received EOL care, if no patient received it in the ICU, then (as it is most unusual as compared to the current literature of lung cancer in France, Brazil or the US) please address this issue in the discussion section.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
