Reviewer's report

**Title:** Influence of family size and birth order on risk of cancer: a population-based study

**Version:** 8  **Date:** 19 April 2011

**Reviewer:** Jacqueline Clavel

**Reviewer's report:**

The authors gave satisfactory responses to my last questions 4a and 5a but they did not answer or gave hasty responses to my other questions. In this context, a 4th review would probably not bring substantial improvement and I could understand if you think that my last comments can be skipped.
