Reviewer's report

Title: Phase II Study of the Combination Carboplatin plus Celecoxib in Heavily Pre-treated Recurrent Ovarian Cancer Patients

Version: 4 Date: 29 April 2011

Reviewer: David Tan

Reviewer's report:

Minor essential revisions:

Please state clearly in the methods why the 4 weekly carboplatin regimen was used - i.e. that this was chosen to reduce toxicities and improve quality of life whilst on chemotherapy. The authors have alluded to this in the discussion in the revised manuscript but have not made this clear.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
