Reviewer’s report

Title: Bilateral ovarian teratoma complicated with carcinomasarcoma in a 68 year old woman: a case report

Version: 1 Date: 8 November 2010

Reviewer: Luis O Sarian

Reviewer’s report:

Major compulsory revisions
This is a report on a case of ovarian teratoma associated with carcinomasarcoma. Indeed, this association is uncommon, but it is not a clinical challenge worthy of being published in a respectful journal. Most references (one exception - 2003) date back to the nineties or earlier; authors should seek for updated ones.

Level of interest: An article of insufficient interest to warrant publication in a scientific/medical journal

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
