Reviewer's report

Title: SIP1 is Downregulated in Hepatocellular Carcinoma by Promoter Hypermethylation

Version: 1 Date: 15 December 2010

Reviewer: Sara Ladu

Reviewer's report:

1) Major Compulsory Revisions
Additional necessary experiments in cell lines; in figure 3B you show iper-regulation of GAPDH after treatment instead to no treatment. Normally, housekeeping genes should have the same trend both with and without treatment.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
