Reviewer's report

Title: COX-2 Gene Expression in Colon Cancer Tissue related to Regulating Factors and Promoter Methylation Status

Version: 1 Date: 18 April 2011

Reviewer: dermot kelleher

Reviewer's report:

The authors have addressed many of the issues concerned. I have one further comment. I don't believe that Akt1 is specifically an immunological gene - it could equally be described as metabolic. Without this, there is a need to re-focus the immunological discussion.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.
