Reviewer's report

Title: FAP-overexpressing fibroblasts produce an extracellular matrix that enhances invasive velocity and directionality of pancreatic cancer cells

Version: 2 Date: 27 May 2011

Reviewer: yves boucher

Reviewer's report:

Lee et al provide additional results showing/supporting that the expression of the fibroblast-activation protein by fibroblasts remodels fibronectin and collagen fibers and enhances the directionality of cancer cells.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
