Reviewer’s report

Title: Deletion of the thrombin cleavage domain of osteopontin mediates breast cancer cell adhesion, proteolytic activity, tumorigenicity, and metastasis

Version: 2 Date: 18 November 2010

Reviewer: Paul Shore

Reviewer’s report:

Whilst the authors have not mutated the cleavage domain they have addressed the main issue by adjusting the text and conclusions.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
