Reviewer’s report

Title: Deletion of the thrombin cleavage domain of osteopontin mediates breast cancer cell adhesion, proteolytic activity, tumorigenicity, and metastasis

Version: 2 Date: 9 November 2010

Reviewer: Hwyda Arafat

Reviewer’s report:

Although there were certain points raised by the reviewers that the authors considered beyond the scope of their study, I find all in all that they did a good job responding to most of the authors’ comments.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
