Reviewer's report

Title: Quality of Life Assessment: An Independent Predictor of Survival in Lung Cancer

Version: 1 Date: 19 December 2010

Reviewer: thida win

Reviewer's report:

Quality of Life Assessment: An Independent Predictor of Survival in Lung Cancer
1. Well defined question and answer well.
2. Method is appropriate and well described, however, it was not clear, when and how receive the follow up information and quality of data.
3. The data is sound, however, quality is in question as nor prospectively collected.
4. The manuscript adhere to the relevant standards for reporting and data deposition.
5. Discussion and conclusions are well balanced and adequately supported by the data.
6. Limitations of the work are clearly stated.
7. Good discussion regarding background literature.
8. Title and abstract accurately convey the message.
9. Good writing style.

Recommendation: Discretionary Revisions, as very interesting study, added value to current literature. Recommend more reassurance regarding data quality.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
