Reviewer's report

Title: Efficacy of Epidermal Growth Factor Receptor targeting in advanced chordoma: case report and literature review

Version: 3 Date: 19 August 2011

Reviewer: Philippe Cassier

Reviewer's report:

Major compulsory revision: None
Minor essential revision:
1) consider linguistic editing: sentences such as "responses concerned local relapses...and lasted a long time" for example, should be rephrased.
2) references for previous reports of EGFR inhibitors in chordoma shoudl be cited in the case presentation (they only appear in the discussion)
Discretionary revision: none

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I have received honoraria and travel reimbursements from Roche and Novartis
