Reviewer's report

**Title:** Oncolytic Targeting of Androgen-sensitive Prostate Tumor by the Respiratory Syncytial Virus (RSV): Consequences of Deficient Interferon-dependent Anti-viral Defense

**Version:** 2 **Date:** 14 August 2010

**Reviewer:** William Jia

**Reviewer's report:**

The revision has addressed major concern of this reviewer and i am quite happy for the responses except for the TUNEL staining pattern in LNCaP tumor in vivo. i dont think i can agree with the speculation by the authors in their response. But this point is minor since the pattern in the other cells are normal and their in vitro data support the apoptosis induced by the viral infection.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
