Reviewer’s report

Title: EpCAM Overexpression Is Associated with Downregulation of Wnt Inhibitors and Activation of Wnt Signalling in Human Breast Cancer Cell Lines

Version: 2 Date: 3 August 2010

Reviewer: Margot Zoller

Reviewer’s report:

The revised version of the manuscript “EpCAM Overexpression Is Associated with Downregulation of Wnt Inhibitors and Activation of Wnt Signalling in Human Breast Cancer Cell Lines” by JM Gostner et al. has taken most of the reviewers’ comments into account. I particularly appreciate that the authors demonstrated that even within one tumor entity the impact of EpCAM expression may be variable and depending on several additional factors. The manuscript appears now well suited for publication in BMC Cancer.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
