Reviewer’s report

Title: The PACOVAR-trial: A phase I/II study of pazopanib (GW786034) and cyclophosphamide in patients with platinum-resistant recurrent, pre-treated ovarian cancer

Version: 1 Date: 7 September 2011

Reviewer: Gabriella Ferrandina

Reviewer’s report:

1. Will the study design adequately test the hypothesis?
R: I retain that the design of the study adequately test the hypothesis

2. Are sufficient details provided to allow replication of the work or comparison with related analyses: if not, what is missing?
R: Replication of the work is certainly possible with the provided details

3. Is the planned statistical analysis appropriate?
R: The planned statistical analysis seems appropriate

4. Is the writing acceptable?
R: Also the writing seems acceptable.

On the other hand I retain that a more appropriate background regarding the rationale of employing this combination in this specific clinical setting needs to be provided.
