Title: Methylenetetrahydrofolate reductase polymorphisms and interaction with smoking and alcohol consumption in lung cancer risk: a case-control study in a Japanese population

Version: 3 Date: 8 October 2011

Reviewer: Ulrika Ericson

Reviewer's report:

- Minor Essential Revisions
  1/ line 317. Do you mean insufficient?
  2/ line 360. Although no significant interaction was seen, the observed risk estimates indicate interaction. So please add: However, the risk estimates...

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
