Reviewer’s report

Title: Expression pattern of class I histone deacetylases in vulvar intraepithelial neoplasia and vulvar cancer: A tissue microarray study

Version: 1 Date: 3 May 2011

Reviewer: Maria Paravatou

Reviewer’s report:

Major Compulsory Revisions
I do not recommend any major revisions

Minor Essential Revisions
1. It is important that the authors include a detailed legend to Table 3, in order to make the discussion of their results clear and accessible, in which all parameters used should be defined and subsequently used in the paper.
2. In paragraph 8 of the results section the authors need to clarify their argument with the results present in Table 3.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
