Reviewer's report

Title: Diet Folate, DNA Methylation and Genetic Polymorphisms of MTHFR C677T in Association with the Prognosis of Esophageal Squamous Cell Carcinoma

Version: 2 Date: 10 February 2011

Reviewer: Karen Curtin

Reviewer's report:

The authors have satisfactorily addressed the comments of this reviewer, and in my opinion comments of the other reviewer, and the quality of the English is much improved.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I have no competing interests.
