Reviewer’s report

Title: Integrated mutation, copy number and expression profiling in resectable non-small cell lung cancer

Version: 2 Date: 21 December 2010

Reviewer: Andrea Staratschek-Jox

Reviewer’s report:

I again reviewed the manuscript especially with regards to my own initial comments and suggestions. All points are now addressed sufficiently. However the authors still need to provide the GEO ID for their own data set which is not yet available since the submission process is not completed. However the authors can be trusted to make this change after receiving the ID from the GEO data base. I therefore recommend that the manuscript can be accepted after this minor essential revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
