Reviewer's report

Title: Tetrathiomolybdate sensitizes ovarian cancer cells to anticancer drugs doxorubicin, fenretinide, 5-fluorouracil and mitomycin C

Version: 1 Date: 22 January 2012

Reviewer: Gazala Khan

Reviewer's report:

Overall sound experimental techniques and assays used. Would recommend additional clarification on the choice of specific chemotherapeutic drugs

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
