Title: Human chorionic gonadotropin and its relation to grade, stage and patient survival in ovarian cancer

Version: 1 Date: 23 November 2011

Reviewer: Jinsong Liu

Reviewer’s report:

Overall, this is a very nice study, well designed, the conclusion is valid.

I have only a few questions, which should be addressed: The serous carcinoma, are all high grade or also low grade? What is the definition of benign? Do they include borderline tumor?

The author should also cite a paper published recently in Am J Pathology by Guo et al. "Overexpression of the # subunit of human chorionic gonadotropin promotes the transformation of human ovarian epithelial cells and ovarian tumorigenesis".
