Reviewer's report

Title: Late onset Li-Fraumeni syndrome with bilateral breast cancer and other malignancies: case report and review of the literature

Version: 1 Date: 20 February 2012

Reviewer: Steven Narod

Reviewer's report:

- Major Compulsory Revisions
This is an interesting case report. It is far too long.
Length should be cut in half. Too much detail in cases and too much discussion. No one will ever finish it. Cut to 1000 words
Also need a more comprehensive review of testing for p53 mutations in early onset breast cancer

- Minor Essential Revisions
none

- Discretionary Revisions
None

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
