Reviewer's report

Title: Promoter hypermethylation-induced transcriptional down-regulation of the gene MYCT1 in Laryngeal Squamous Cell Carcinoma

Version: 1 Date: 27 March 2012

Reviewer: martin granados

Reviewer's report:

The work seems well conducted and analyzed, but clinical implications of your findings has not been discussed, we think this is one issue.
Limitations of the study has not been stated, they need to be added.
I think there is one incorrect word in abstract, it said wide, in think you refer to "wild".

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
