Title: Li-Fraumeni-like syndrome associated with a large BRCA1 intragenic deletion

Version: 2 Date: 2 April 2012

Reviewer: Ed Hollox

Reviewer's report:

Goncalves et al.

Li-Fraumeni-like syndrome associated with a large BRCA1 intragenic deletion.

This paper has satisfactorily addressed my comments and concerns. I have a few minor comments:

Minor essential revisions
1. Page 10, paragraph 2. The DNA used as a reference in the aCGH experiments should be described.
2. Page 10, paragraph 3. 5# and 3# should be added to the primer sequences.
3. Figure 2. What does the arrow actually represent here? I assume it is the inferred breakpoint but this is not stated in the legend.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
