Reviewer's report

Title: Menin and p53 have non-synergistic effects on tumorigenesis in mice

Version: 1 Date: 2 January 2012

Reviewer: Peter Igaz

Reviewer's report:

The article reports on the possible synergism between p53 and menin. The authors have concluded interesting animal experiments to study the subject. The aims, methodology, results and conclusions seem to be correct and clear. I propose the acceptance of this manuscript.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
