Reviewer's report

Title: Inhibition of STAT3 signaling and induction of SHP1 mediate antiangiogenic and antitumor activities of ergosterol peroxide in U266 multiple myeloma cells

Version: 3 Date: 26 August 2011

Reviewer: Alessandra Russo

Reviewer's report:

The manuscript reports the anti-angiogenic activity of EP with the underlying molecular mechanisms in human multiple myeloma U266 cells. The research represents a good contribution to the field. However, a point was raised that require attention:

- It well known that some natural compounds could be interfere with MTT salts. Therefore, the medium would be removed before to add the MTT salts.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
