Reviewer's report

Title: Additional Diagnostic value of Tumor markers in Cytological fluid for Diagnosis of non-small-cell lung cancer

Version: 1 Date: 7 July 2012

Reviewer: Krishna Bajee Sriram

Reviewer's report:

The study by Hur et al builds on their previous study (JTO 2011, 6(8) 1330-5. They have evaluated the utility of 3 tumour markers in diagnosing NSCLC presenting as lung nodules.

Major compulsory revisions-nil

Discretionary revisions-In the introduction section, the authors may want to mention the findings of their original study and state the reasons for undertaking the current study.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
