Reviewer's report

Title: Differential effects of arsenic trioxide on chemosensitization in human hepatic tumor and stellate cell lines

Version: 2 Date: 29 August 2012

Reviewer: Wei Jiang

Reviewer's report:

Discretionary Revisions
The authors have answered properly to most of my comments. However, I personally believe the inclusion of co-culture experiments and/or in vivo models would highly improve the work.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
