Reviewer's report

Title: Targeting SPARC inhibits cervical cancer cell growth and metastasis by lentivirus-mediated RNA interference

Version: 1 Date: 22 June 2012

Reviewer: Tetsuya Nakatsura

Reviewer's report:

The authors indicated in this paper that SPARC is related to the invasive phenotype of cervical cancer cells. This paper is acceptable for publication in BMC Cancer, but I would raise the following issue regarding their description in this article.

1. Abstract Page 2, line 36 and 37, Ovarian cancer should be corrected to cervical cancer.

2. Figure legends should be written in detail.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
