Reviewer's report

Title: Influence of Oral Glutamine Supplementation on Survival Outcomes in Locally Advanced Non-Small Cell Lung Cancer Patients Treated with Concurrent Chemoradiotherapy

Version: 4  Date: 1 August 2012

Reviewer: nada rotovnik kozjek

Reviewer's report:

The authors answered to the majority of comments in the previous revision and improved the article substantially.
1. The question posed by the authors is better defined.
2. The methods are still poor, but description is clear.
3. The data from small group offers good information about the treatment effect.
4. The manuscript adheres to the relevant standards for reporting and data deposition.
5. The discussion and conclusions are better balanced and adequately supported by the data.
6. Limitations of the work are stated.
7. The authors clearly acknowledge some published sources upon which they are building.
8. The title and abstract are acceptable to convey what has been found? With limitation.
9. Is the writing acceptable? Yes, but there is still place for improvement.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
