Reviewer’s report

Title: Genotypic and phenotypic analysis of male breast cancer shows under representation of the HER2 and basal subtypes in BRCA-associated carcinomas.

Version: 4 Date: 25 September 2012

Reviewer: Larissa Korde

Reviewer’s report:

This paper is much improved with the suggested revisions. I agree with the tone and conclusions. I do think the number of tables and figures could be decreased, but would leave this decision to the authors and editorial board.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I have no competing interests.
