Reviewer’s report

Title: Can treatment with Cocculine improve the control of chemotherapy-induced emesis in early breast cancer patients? A randomized, multi-centered, double-blind, placebo-controlled Phase III trial

Version: 2 Date: 28 September 2012

Reviewer: Noah Samuels

Reviewer’s report:

The revised version of the article presents the findings in a much more clear and cogent fashion.

The only important correction needed is in the paragraph "Randomization and blinding" in the Methods section on page 6. The Jadad/Oxford score is given by someone reviewing an article, and should not appear in the manuscript itself.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
