Reviewer’s report

Title: Molecular Pathways Undergoing Dramatic Transcriptomic Changes During Tumor Development in the Human Colon

Version: 3 Date: 5 November 2012

Reviewer: Pablo Conesa-Zamora

Reviewer’s report:

Major compulsory revision
This study is, to a major extent, confirmatory of previous works. The authors should include an analysis in which villous component and grade of dyplasia along with size are taken into account in order to classify the polyps. The already performed analysis in which only size was taken into account could be complementary to this proposed analysis.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
