Reviewer’s report

Title: The TERT rs2736100 Polymorphism and Cancer Risk: A Meta-analysis Based on 25 Case-Control Studies

Version: 2 Date: 28 November 2011

Reviewer: Kshitij Srivastava

Reviewer’s report:

Minor Essential Revisions

the sentence "In our meta-analysis, most of the cancer types were lung cancer and glioma" in background section of manuscript should be removed and put in results section.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
