Reviewer’s report

Title: Pancreatic Cancer Clusters and Arsenic-Contaminated Drinking Water Wells in Florida

Version: 2 Date: 1 June 2012

Reviewer: Victor Martinez

Reviewer’s report:

I’ve read the response letter from authors of the manuscript “Pancreatic Cancer Clusters and Arsenic-Contaminated Drinking Water Wells in Florida” and checked the revised version of the papers. In my opinion, authors have addressed all the major compulsory comments made on the first revision. The discussion has been improved, being now focused on the actual findings. Also, confounding sections on the discussion, such as “screening” and “smoking” have been deleted or relocated.

The discussion is now supported by the data obtained. I suggest acceptance of the manuscript.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
